

Timothy White

President, Refrigeration
Carrier

Timothy N. White is President, Refrigeration, for Carrier, leading the company's global transport and commercial refrigeration businesses and cold chain monitoring solutions. Tim is responsible for driving profitable growth through innovative and sustainable solutions and services that protect and preserve the world's supply of food and pharmaceuticals.

Tim has more than 30 years of total business experience. Prior to joining Carrier, he served as CEO, Onshore Wind for the Americas region at General Electric, focused on electric renewable energy. Previously he held a number of senior leadership roles with Raytheon Technologies during his 24-year tenure, including President, Power & Controls and President, Electric Systems for the company's Collins Aerospace division. At Collins, Tim focused on the design, development and market readiness of electrification of flight to provide more efficient carbon-neutral technologies to the aerospace industry.

Tim earned a bachelor's degree in mechanical engineering from Bradley University and an MBA from Regis University.
