MyWay™

A distinctive, mobile experience within intelligent buildings

An innovation for owners, managers and occupants

Enabling an intelligent building

What is it?

A building services platform that enables occupants to control and personalize how they interact with a building. MyWay can open doors, control temperature, adjust lighting and gain access to other features, such as locating available conference rooms or finding someone in the building.

MyWay provides a distinctive technology to attract and retain employees or garner higher lease rates.

It is scalable and works with:

- Non-Carrier applications, such as lighting management systems, office productivity suites, third-party indoor location services
- Individual buildings or intelligent campuses
- API-based client applications

Why use it?

Operational Efficiency

- MyWay provides occupant usage data that can be analyzed and used to improve building operational efficiencies

Occupant Experience

- MyWay significantly improves productivity by quickly:
  - Finding a co-worker in the building
  - Booking conference rooms
  - Wayfinding, i.e., locating a colleague's office, copy rooms, restrooms
- MyWay enables a personalized experience allowing users to pre-set lighting and comfort preferences

MyWay at a glance

Search the building directory for people and spaces

MyWay's indoor location services will indicate the space you are in

Keep your spaces feeling just right for you with lighting and temperature controls on the go!

Call an elevator by choosing your desired destination floor. MyWay will intelligently locate the nearest elevator bank

Unlock badge readers near you with your mobile credential

Browse the building's map and find your way to points of interest

Keep collaboration flowing by easily booking conference rooms from MyWay
